

SPOT LIGHT

PIXI MAX PHAM1461XLET-40020

PIXI MAX is a newly developed RGBL four-in-one high-power spotlight, with a more mixed color and advanced intelligent color management system to better ensure the consistency of the light color. The round design creates a low wind resistance coefficient, small volume and good environmental integration, which meets the requirements of pole installation. With an adjustable hood, RDM bi-directional feedback function, the new spot can provide the real-time feedback for malfunction and working status, reducing the cost for troubleshooting and maintenance. Suitable for landscape lighting projects such as garden, bridges, scenic spots and historical buildings. With color consistency system 3.0, the product can have 24 preset colors to make the color effect quickly and precise, also has CCT function from 1800k to 10000k, to achieve different color temperature effect for clients. Anyway with this new system, we can keep the different batch production with the same colors.
